

## **CARING FOR YOUR MINIATURE WIG**

The viscose wig is FRAGILE – the more you handle it – the more likely the curls will fall out; so please read the following instructions:

- Make sure that your hands are clean and dry. The viscose tends to collect excess oil and moisture from your skin, which causes the style to fall out.
- Only wig your doll after you have finished dressing her.
- To attach the wig – run a thin line of glue around the inside edge of the wig and allow to become tacky. Position the wig and using a thin knitting needle or large darning needle; press the wig to her head. DO NOT use your fingers, (will flatten the curls) or a wooden toothpick (the wood grain could catch at the viscose)
- Decorate with flowers, combs, ribbons, feathers, etc. (See below)
- Mist with hairspray.
- If the ringlets loosen over time – cut off the ends of ear-buds (Q-Tips) and use the shaft as a long, lightweight roller to re-curl.

For more pictures of the wigs on my dolls – please see the “Doll Diaries” on my website:
